

SCHUMPETER CIRCLE

DISRUPTING THE PYRAMID™

Concept Note

Schumpeter Circle (SC) is a blog inspired by Joseph Schumpeter's notion of "creative destruction" – the circular process by which innovation and intellectual progress transform the fabric of old paradigms, into the establishment of new and/or revamped industries. This has been manifested in the age of the Fourth Industrial Revolution (4IR), in which breakthroughs of the sciences, computing power and artificial intelligence have led to an exponential increase in technological advancements. Driving these changes are thought leaders from multiple disciplines, who have sought to challenge the status quo with bold ideas and inventions.

Potential Topics

Innovation: The nature of advancement or novelty of innovation as a whole or of a discipline (e.g. CRISPR and genetic engineering)

Technology & Society: how do technological advancement impact society at the micro and/or macro levels (e.g. the digital divide of developing economies)

Disruptive Innovation: how are new businesses and markets developed? How do such innovations impact economic development? (e.g. all-in-one personal computer)

Intersection of Innovation, Policy & Law: Investigating legal and policy issues relating to innovation (e.g. generative AI and the issue of copyrights)

Emerging Technologies: How AI, VR, blockchain, and other novel technologies impact their fields and humanity as a whole (e.g. blockchain and the economy)

Schumpeter Circle aims to serve as a digital platform home to a diverse range of novel concepts, ideas theories, and innovations by a spectrum of experts around the world towards the advancement of technology and betterment of society

SC authors come from multiple disciplines, including Economics; Political Science; Artificial Intelligence; Blockchain; Base of Pyramid Innovation; Environmental Science; Intellectual Property; Biotechnology, etc.

Posting Criteria

SC hosts a diverse collection of insights from pioneers of various countries and disciplines, towards the crosspollination of ideas, promotion of healthy discourse, and promotion of creativity. Accordingly, there will be no alterations of the contributions except minor editing. Although SC posts are curated by the editorial committee, selection criteria fosters a diverse spectrum of voices and ideas.

SC Contributors

- Former President of Peru: Dr. Francisco Sagasti
 - Founder-Chairman of Praj Industries & Bioeconomy Pioneer Dr. Pramod Chaudhari
 - Professor of Economics at Columbia University: Dr. Richard "Dick" Nelson
 - Professor of IP at American University and Founder of IP Index: Dr. Walter Park
 - Biotechnology & IP Expert, founder of Finston Consulting: Ms. Susan Finston
 - Dean of Cairo Law School & Foreign Diplomat: Dr. Mahmoud Kebeich
 - IT Pioneer: Mr. Harish Mehta
 - BioAfrica Founder: Dr. Nhlanhla Msomi
 - US Diplomat to the African Union: Ambassador John Simon
 - Former Chief Counsel of Technology & Private Equity at the IFC : Mr. Gordon Meyers
 - IIT-IIT Co-Founders: Mr. Nandan Maluste & Mr. Joe Fernandes
- ... and many more!
